200mm Injection Insulated Combination Plier

Professional and at-home electricians rely on the Insulated Electrician Tools for all electrical work; Each tool has an approximate 200mm overall length with 90mm shaft and 110mm handle. Insulated two-color dual component handles are volt tested to protect against injury by electric shock and is safe up to 1,000V; VDE approved with protective handle grip for working around A/C or high voltage DC equipment such as live panels and wires. Long nonslip grip rubber handles that offer safe and comfortable operation for less user fatigue and more productivity. Constructed from drop-forged, heat-treated chrome vanadium steel (CR-V) for maximum strength and longevity that resists rust and corrosion; Sharp cutting edge, dynamic high-performance joints, and strong gripper teeth jaw hardness allows for smooth operation.
